

PEPPERMINT DUST

Once upon a time, in a land far away, there lived a jolly man who loved to give and play. His name was Santa, and he had a team of reindeer, who helped him deliver presents, spreading joy far and near.

But Santa had a problem, a big one indeed, He needed to go around the world, and do it with speed. The reindeer could fly, that was no doubt, But Santa needed them to go super-fast, without a pout.

So, he called upon his friend, the great candy cane maker, to help him create something, to make his reindeer go quicker. They worked and they toiled, with magic and glee, and soon they had created something, that was the key.

It was peppermint dust, made from crushed candy canes, that when added to the reindeer food, created super-fast lanes. The reindeer ate the food, and felt the magic inside, and before they knew it, they were taking a joyride.

They flew and they soared, faster than ever before, and in one night, they went around the world and more. The children woke up, with presents by their side, And Santa smiled, knowing he had done his worldwide ride.

So now you know, the secret of Santa's sleigh, and how he and his reindeer make their way. With the spirit and magic of Christmas in their hearts, and a sprinkle of peppermint dust to help them start.
